Projects

2023/10 – 2024/01

RESUME SCRAPING USING NLP

Resume scraping using Natural Language Processing (NLP) has become a crucial aspect of the recruitment process, driven by the need for efficiency, automation, and improved candidate selection. As job markets grow and digital platforms make job applications more accessible, the volume of resumes received by companies has increased significantly. Handling a large number of resumes manually is time-consuming and can lead to inefficiencies in the recruitment process.

Software Used : •NLP Libraries and Frameworks •Machine Learning Libraries •Database management system (DBMS) •Authentication and Authorization Software •Python 3.10.1

2023/04 – 2023/06

ONLINE MOVIE TICKET BOOKING SYSTEM

An online movie ticket booking system is a digital platform that allows users to browse, select, and purchase movie tickets from the comfort of their homes or mobile devices. It streamlines the process of buying tickets for movies at cinemas or theaters, offering convenience and efficiency for both users and cinema operators.

Software Used : Visual Studio, Xamp

2019/11 – 2019/12

STORE MANAGEMENT SYSTEM

A store management system in Python is a software application designed to help businesses effectively manage their inventory, sales, purchases, and other operations related to their store or business.

Software Used : Jupyter Notebook (Anaconda3), MYSQL

2024/03 – 2024/04

ELEGANT INTERIOR DESIGN WEBSITE

This project was undertaken during my internship at WOLFOX SERVICES PVT. LTD., and was completed as part of a client assignment. It was the first task assigned to us during the internship. The project culminated in a highly functional and aesthetically pleasing website that met all client specifications. The website was praised for its elegant design, ease of navigation, and comprehensive content. This project was instrumental in enhancing our technical skills and providing us with invaluable experience in managing a real-world client project.

The Interior Design Website project was a significant milestone in our internship at WOLFOX SERVICES PVT. LTD. It offered a rich learning experience and allowed us to contribute meaningfully to the client's business. The project sharpened our web development and project management skills, preparing us for future challenges in our professional careers.

2024/04 – 2024/04

SWAGAT CK RIDER PORTFOLIO WEBSITE

The Swagat CK Rider Portfolio Website project was a pivotal client assignment undertaken during my internship at WOLFOX SERVICES PVT. LTD. This project involved creating a comprehensive, visually striking portfolio website for Swagat CK Rider, an esteemed professional in the field of [e.g., motorcycling, stunt riding]. Our team was tasked with designing and developing a platform that would effectively showcase Swagat's skills, achievements, and professional journey.

The main objective of the project was to develop a dynamic and engaging website that would serve as a digital portfolio for Swagat CK Rider. The website needed to highlight Swagat's achievements, display his extensive portfolio, and provide an engaging user experience. Additionally, it was essential that the website be fully responsive to ensure accessibility across all devices.
